

**Yakima Integrated Plan - Toppenish to Teanaway RCPP Project
Screening Criteria**

Screening		Y/N
1	Is the planning unit located in the priority geographic area for the Yakima Integrated Plan Toppenish to Teanaway Project?	
2	Do the proposed practices address insufficient water/drought, water quality degradation, and/or inadequate habitat for fish and wildlife?	

*Must answer yes to both questions to be considered for RCPP Project funding in Kittitas County

**Yakima Integrated Plan - Toppenish to Teanaway RCPP Project
Insufficient Water-Drought Criteria**

85% of the EQIP Funding Per Fiscal Year \$ 765,731.85

Insufficient Water/Drought		Points	Score
1	Irrigation System Upgrade (score for one option only)		
1a	Is the planning unit in surface irrigation and converting to sprinkler irrigation system (442) or drip irrigation (441) to treat inefficient use of irrigation water?	300	_____
1b	Is the planning unit in wheelline or handline sprinkler irrigation and converting to center pivot, linear or drip irrigation (441) to treat inefficient use of irrigation water?	175	_____
1c	Does the proposed treatment consist of piping an earthen ditch to the farm or field, to treat water quantity?	300	_____
2	Is the planning unit located in the Cascade Irrigation District or Kittitas Reclamation District (North Branch Canal) service areas south of Interstate 90; or is it located in the West Side Irrigating Company or Kittitas Reclamation District (South Branch Canal) service areas south of Manastash Creek?	25	_____
3	Does the project include irrigation water management (449)?	10	_____
Water Quality Degradation			
4	Does tailwater from surface irrigation in this unit flow directly to a river, side channel, creek or canal/lateral?	50	_____
5	Does the tailwater from surface irrigation in this unit flow directly into a creek or canal including and downstream from the Cascade Irrigation District Canal to the Yakima River; or directly into Manastash or Sorenson Creeks, or Packwood Ditch, Westside Canal, or Fogarty Ditch?	25	_____
6	For upgrades from surface irrigation to sprinkler or drip, does more than 50% of the planning unit exceed 2% slope?	50	_____
7	Does the project establish or enhance a 35' average width buffer on at least 50% of the stream/river in the planning unit?		_____
7a	Practice treatment area less than 0.10 acres? (0-124' of treated stream)	10	_____
7b	Practice treatment area between 0.10 and 1 acre? (125' to 1244' of treated stream)	25	_____
7c	Practice treatment area 1 acre or greater? (greater than 1245' of treated stream)	50	_____
Inadequate Habitat for Fish & Wildlife			
8	Does the planning unit include the Teanaway River (including its tributaries), Tucker Creek, Big Creek, Little Creek, Tillman Creek, Spexarth Creek, Taneum Creek, Manastash Creek, Kittitas Valley tributaries (Dry Creek to Badger Creek) below the intersection of Cascade Canal, or the Yakima River or Yakima river side channels and are practices included to address fish habitat improvements (must answer yes and receive points for at least one of questions 10 to 13)?	25	_____
9	Does the planning unit include Kittitas Valley tributaries (Dry Creek to Badger Creek) upstream of the Cascade Irrigation District canal and are practices included to address fish habitat improvements (must answer yes and receive points for at least one of questions 10 to 13)?	15	_____
10	Project includes installation of a fish screen at the water withdrawal site or project consolidates water diversions and eliminates an unscreened diversion?	25	_____
11	Project includes correction of all fish passage barriers in the planning unit or serving planning unit and under control of the applicant?	25	_____
12	Project establishes or enhances a 50' average width buffer on at least 70% of the stream/river in the planning unit?		_____
12a	Practice treatment area less than 0.10 acres? (0-124' of treated stream)	25	_____
12b	Practice treatment area between 0.10 and 1 acre? (125' to 1244' of treated stream)	50	_____
12c	Practice treatment area 1 acre or greater? (greater than 1245' of treated stream)	75	_____
13	Is applicant willing to place at least half of the water saved through conversion to a pipeline or sprinkler/drip system into the Trust Water Rights Program by donation for a period of at least 15 years?	100	_____
14	Are the practices proposed associated with an ACEP-ALE contracted parcel(s) developed through this RCPP project?	100	_____
		TOTAL SCORE	<u>0</u>
* Application may receive points for either question 7 or question 12, but not both		Max Score	810

**Yakima Integrated Plan - Toppenish to Teanaway RCPP Project
Livestock Criteria**

10% of the EQIP Funding Per Fiscal Year \$ 90,086.10

Water Quality Degradation		Points	Score
1	Does this application primarily include fencing, livestock watering facilities and associated practices intended to control and manage livestock grazing on streams/ivers?	250	_____
2	Is the planning unit within the Teanaway Community Forest or adjacent parcels?	300	_____
3	Does the project establish or enhance a 35' average width buffer on at least 50% of the stream/river in the planning unit?		_____
<i>3a</i>	<i>Practice treatment area less than 0.10 acres? (0-124' of treated stream)</i>	10	_____
<i>3b</i>	<i>Practice treatment area between 0.10 and 1 acre? (125' to 1244' of treated stream)</i>	25	_____
<i>3c</i>	<i>Practice treatment area 1 acre or greater? (greater than 1245' of treated stream)</i>	50	_____
Inadequate Habitat for Fish & Wildlife			
4	Does the planning unit include the Teanaway River (including its tributaries), Tucker Creek, Big Creek, Little Creek, Tillman Creek, Spexarth Creek, Taneum Creek, Manastash Creek, Kittitas Valley tributaries (Dry Creek to Badger Creek) below the intersection of Cascade Canal, or the Yakima River or Yakima river side channels and are practices included to address fish habitat improvements (must answer yes and receive points for one of questions 6 to 7)?	50	_____
5	Does the planning unit include Kittitas Valley tributaries (Dry Creek to Badger Creek) upstream of the Cascade Irrigation District canal and are practices included to address fish habitat improvements (must answer yes and receive points for one of questions 6 to 7)?	25	_____
6	Project establishes or enhances a 50' average width buffer on at least 70% of the stream/river in the planning unit?		_____
<i>6a</i>	<i>Practice treatment area less than 0.10 acres? (0-124' of treated stream)</i>	25	_____
<i>6b</i>	<i>Practice treatment area between 0.10 and 1 acre? (125' to 1244' of treated stream)</i>	50	_____
<i>6c</i>	<i>Practice treatment area 1 acre or greater? (greater than 1245' of treated stream)</i>	75	_____
7	Does this application include livestock water facilities associated with converting from an in-stream diversion to a groundwater well to improve instream flows?	300	_____
8	Are the practices proposed associated with an ACEP-ALE or HFRP contracted parcel(s) developed through this RCPP project?	100	_____

TOTAL SCORE _____ 0

* Application may only receive points for question 3 or 6 but not both.

Max Score (No Teanaway)	825
Max Score (In Teanaway)	1125

**Yakima Integrated Plan - Toppenish to Teanaway RCPP Project
Fish & Wildlife Criteria**

5% of the EQIP Funding Per Fiscal Year \$ 45,043.05

Inadequate Habitat for Fish & Wildlife		Points	Score
1	Project will improve floodplain, riparian or instream habitat and the planning unit includes: Yakima River or Yakima River side channels; or Teanaway River (including its tributaries); or Tucker Creek, Big Creek, Little Creek, Tillman Creek, Spexarth Creek, Taneum Creek, Manastash Creek; or Dry Creek, Currier Creek, Reecer Creek, Whiskey Creek, Naneum Creek, Coleman Creek, Cooke Creek, Caribou Creek and Parke Creek below their intersection of Cascade Canal; or Wilson Creek, or Mercer Creek below their intersections with Ellensburg Water Company Canal (must answer yes and receive points for at least one of questions 2 to 4)?	150	_____
2	Project includes correction of all fish passage barriers in the planning unit or serving planning unit and under control of the applicant?	100	_____
3	Project establishes or enhances a 50' average width buffer on at least 70% of the stream/river in the planning unit?		_____
<i>3a</i>	<i>Practice treatment area less than 0.10 acres? (0-124' of treated stream)</i>	25	_____
<i>3b</i>	<i>Practice treatment area between 0.10 and 1 acre? (125' to 1244' of treated stream)</i>	50	_____
<i>3c</i>	<i>Practice treatment area 1 acre or greater? (greater than 1245' of treated stream)</i>	75	_____
4	Project includes instream habitat improvements like installation of rock and/or wood habitat structures?	75	_____
5	Project includes practices associated with an ACEP-ALE or HFRP contracted parcel(s) developed through this RCPP project?	100	_____
		TOTAL SCORE	_____ 0
		Max Score	500
